ExtensionsForce

Contents

Prerequisite 3

Install **Detaverse** Instance (if you already have this one just skip this step) 3

Import Proof of Delivery solution 3

Set Environment Variables 5

Enable **GeoSpatial** Services 11

Configuring **ExtensionForce-TMS-ProofofDelivery** application 13

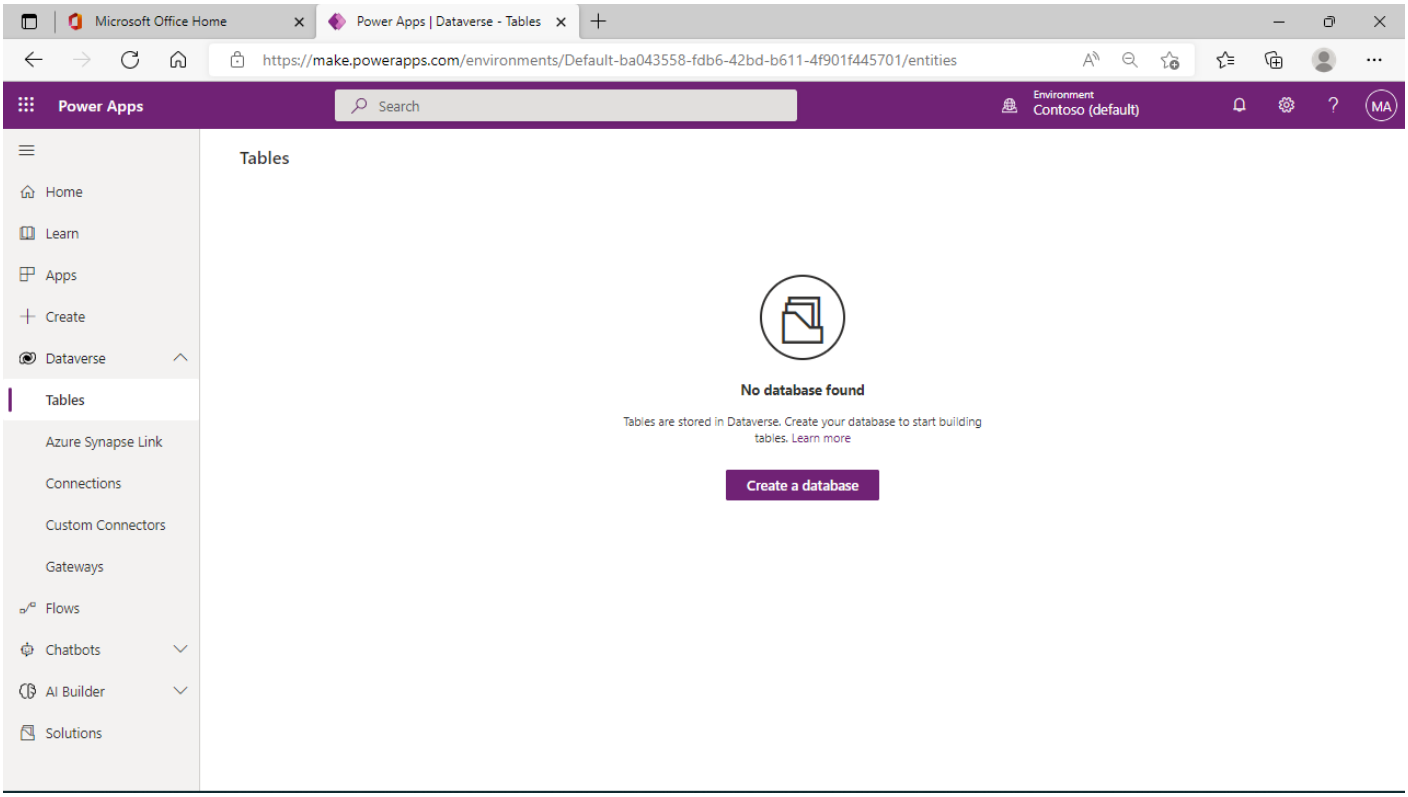
ExtensionsForce

Prerequisite

- Pease make sure you have **Business Central** with **ExtensionsForce TMS module**
- Download **ExtensionsForce TMS Proof of Delivery Solution zip file** from https://www.extensionsforce.com/proofofdelivery

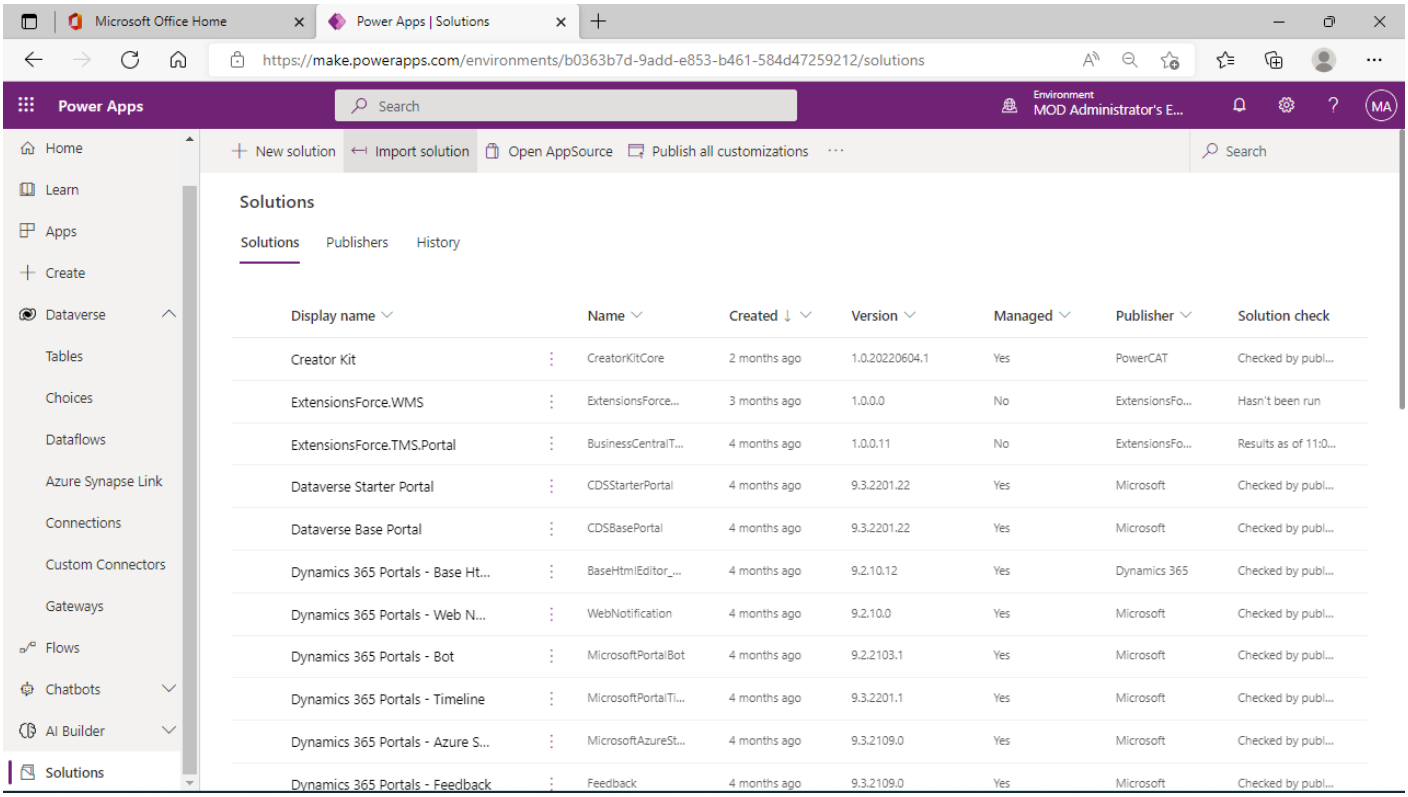
Install **Detaverse** Instance (if you already have this one just skip this step)

Open **Power Apps** (for example from https://portal.office.com), choose **Environment** you wish to install the **Proof of Delivery** Application, choose **Solutions** and Click on **Create a database** button:

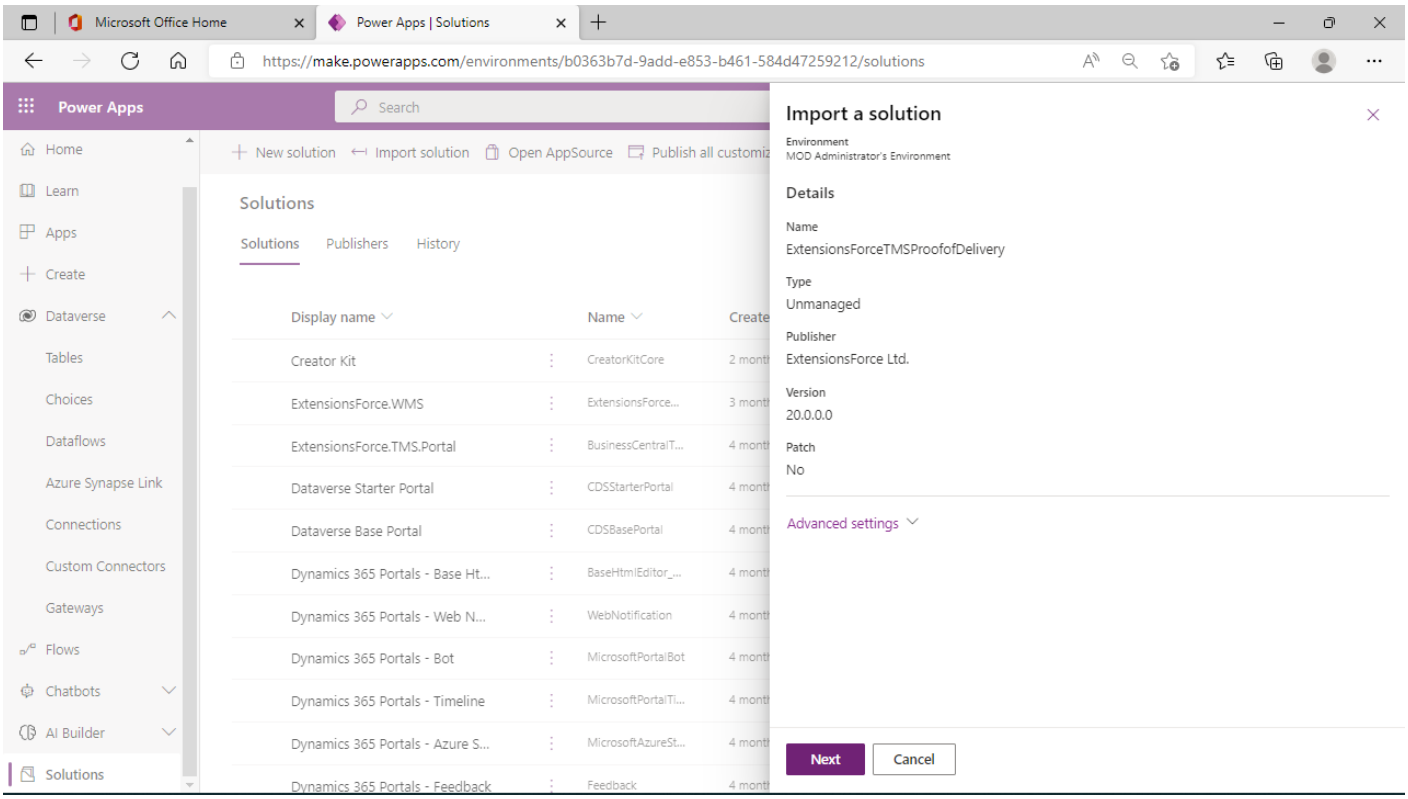


Import Proof of Delivery solution

Click on **Import Solution** button and choose **Proof of Delivery** solution zip file

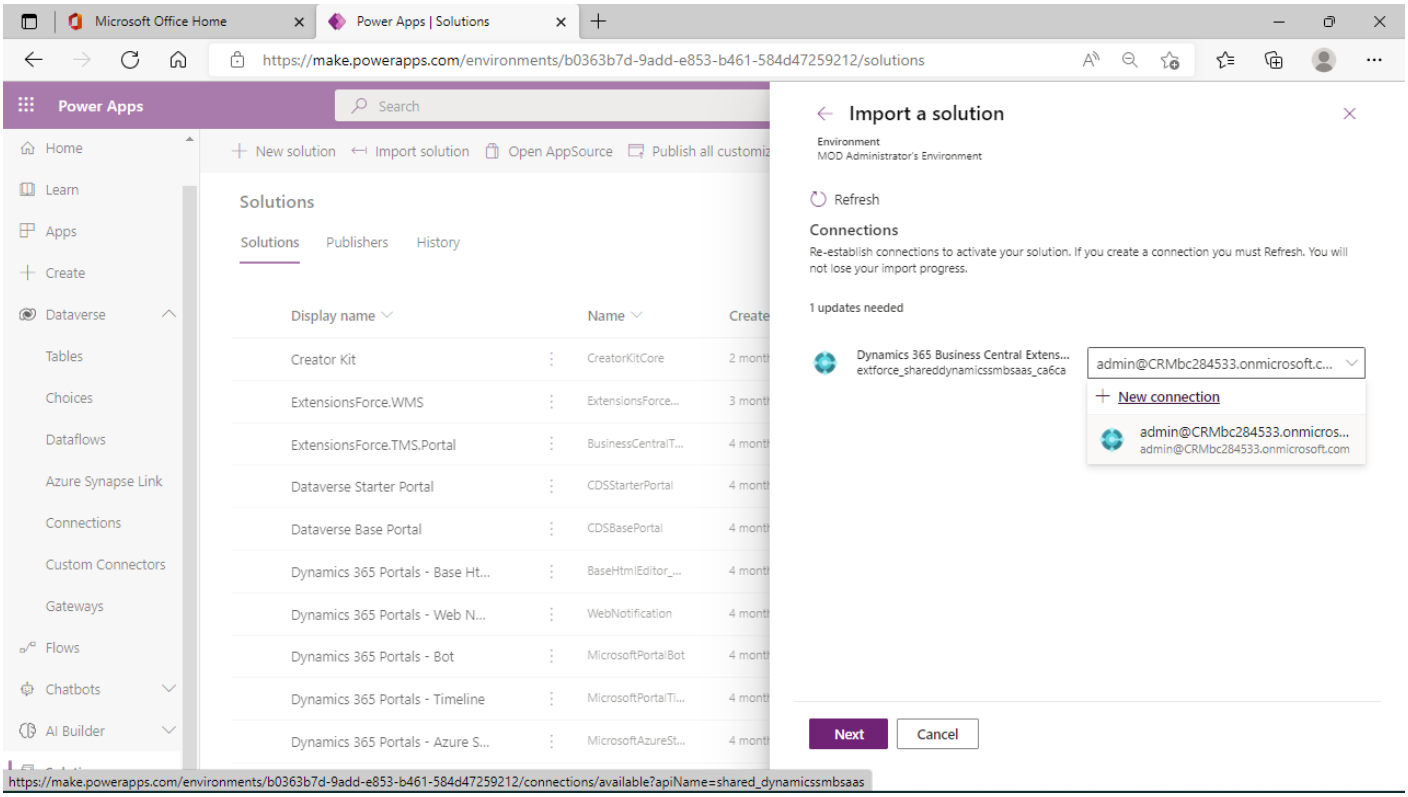


Leave default settings and click **Next**

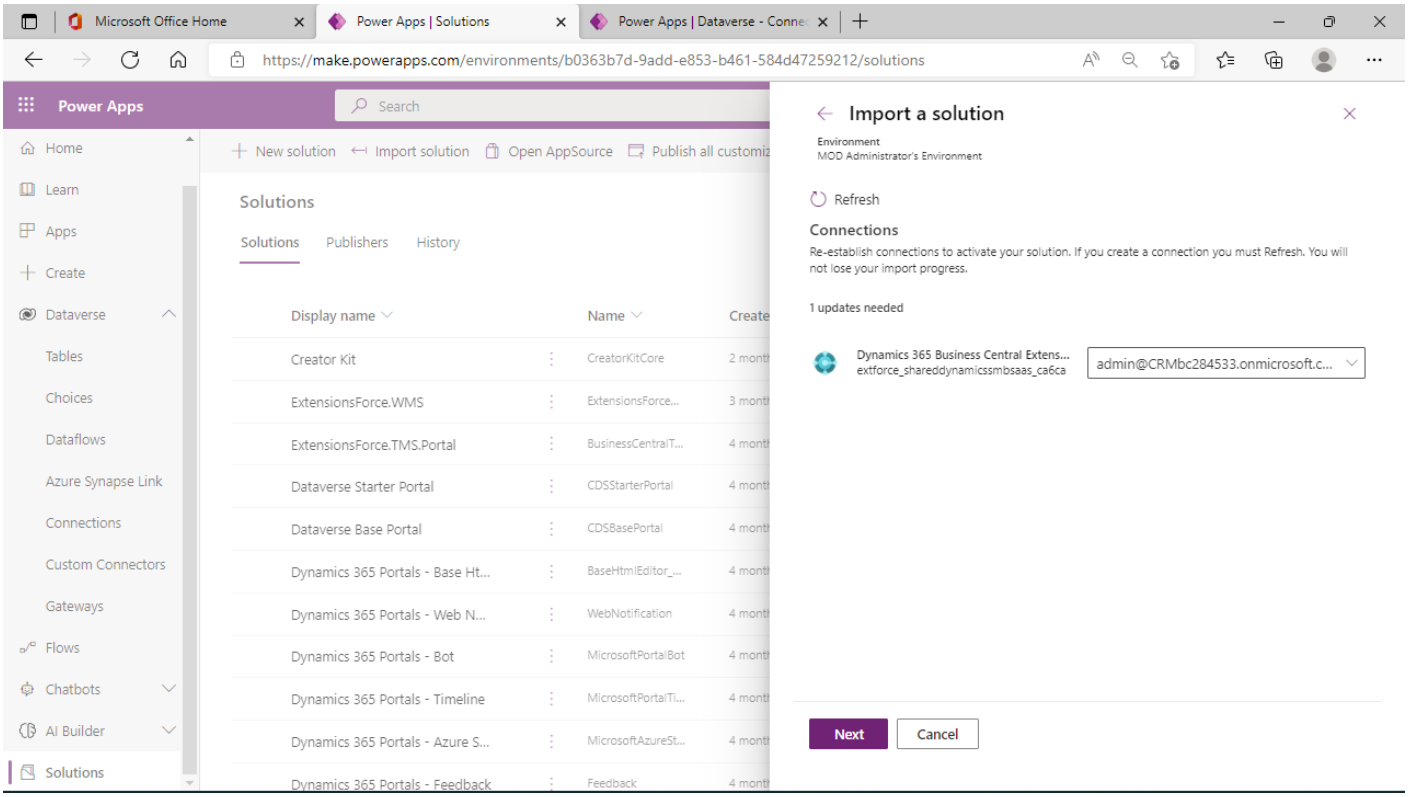


During Importing establish connection to Business Central:

Choose **Select a connection** – **New connection**

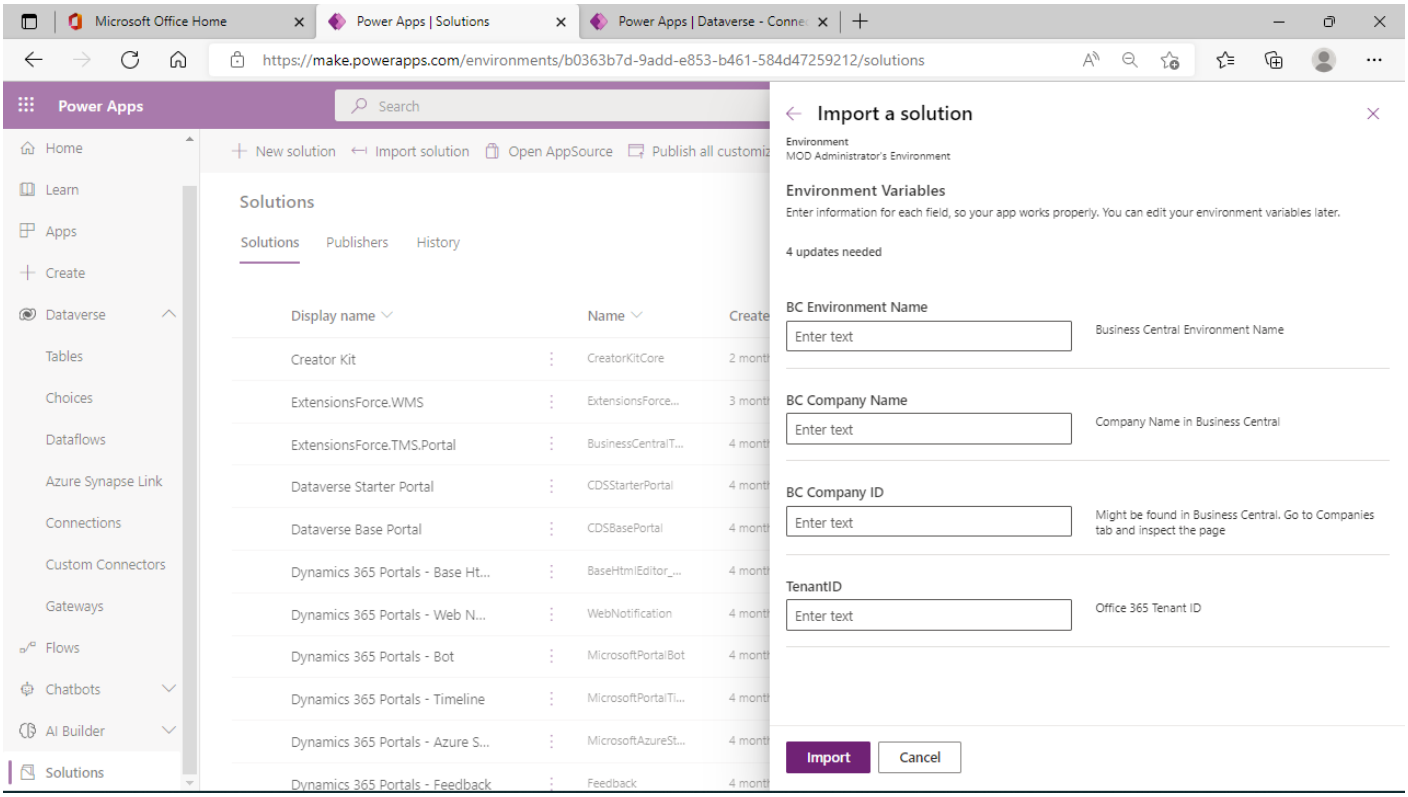


After the Connection is created go back to the **Import a solution page** and **Refresh** the page. Make sure the Connection is chosen and click **Next**:

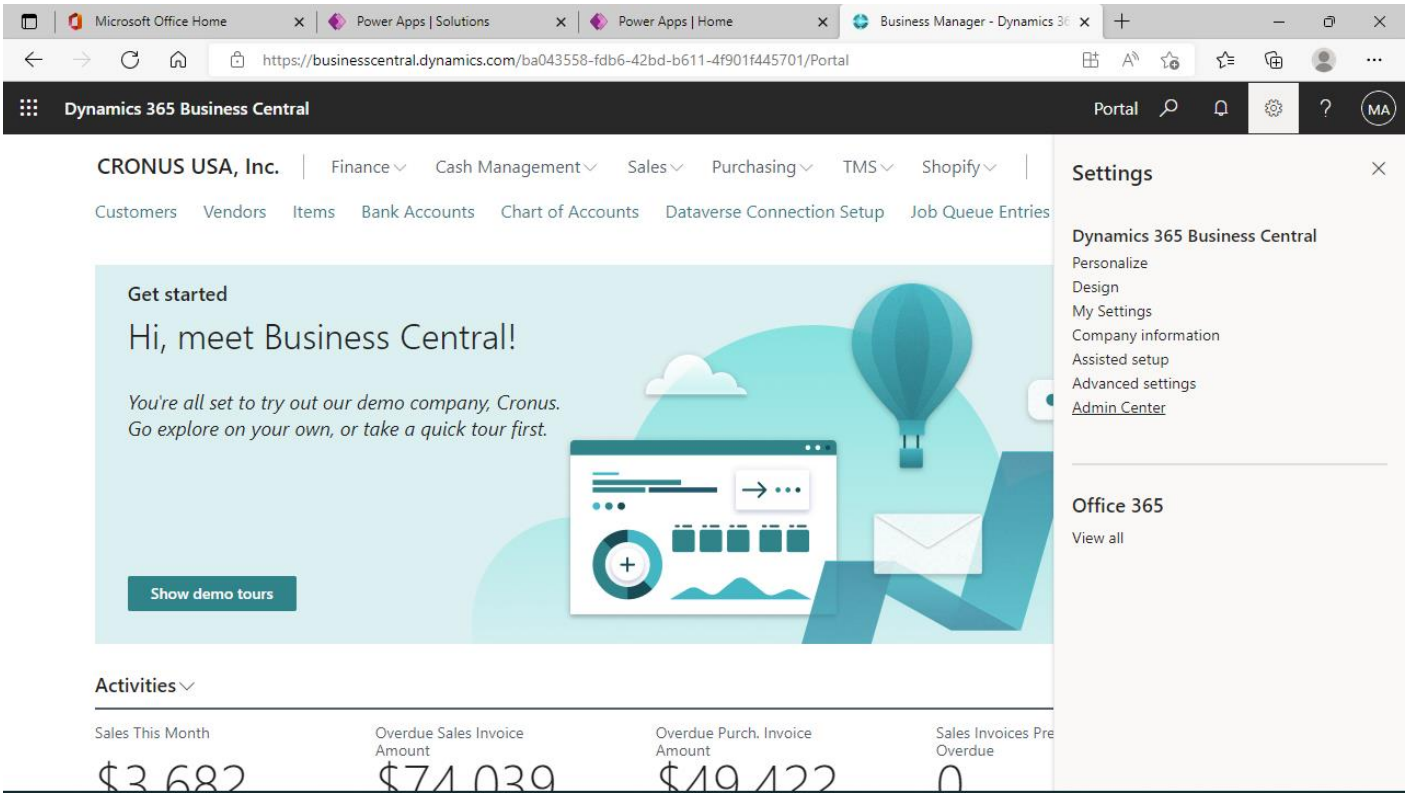


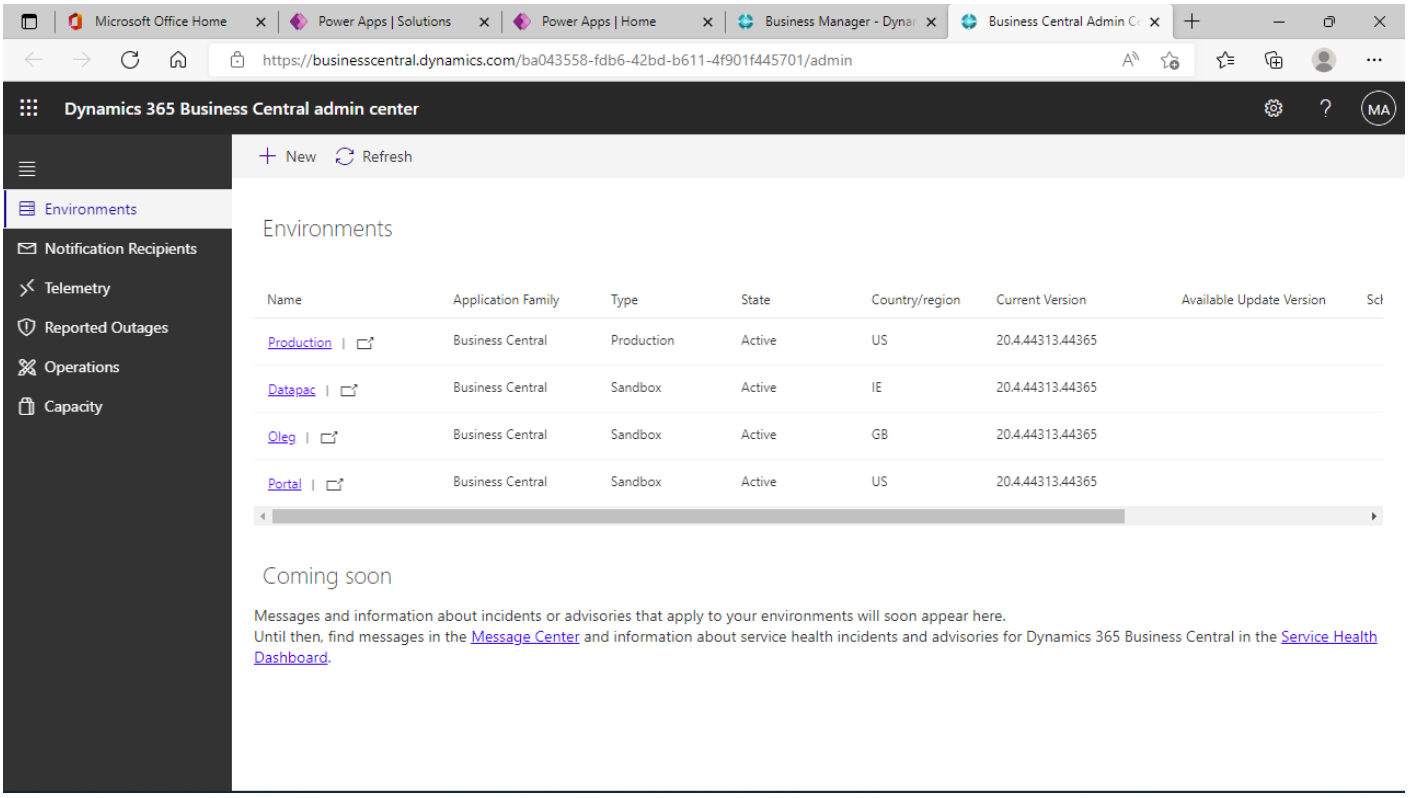
Set Environment Variables

You have to Set your Environment Variables

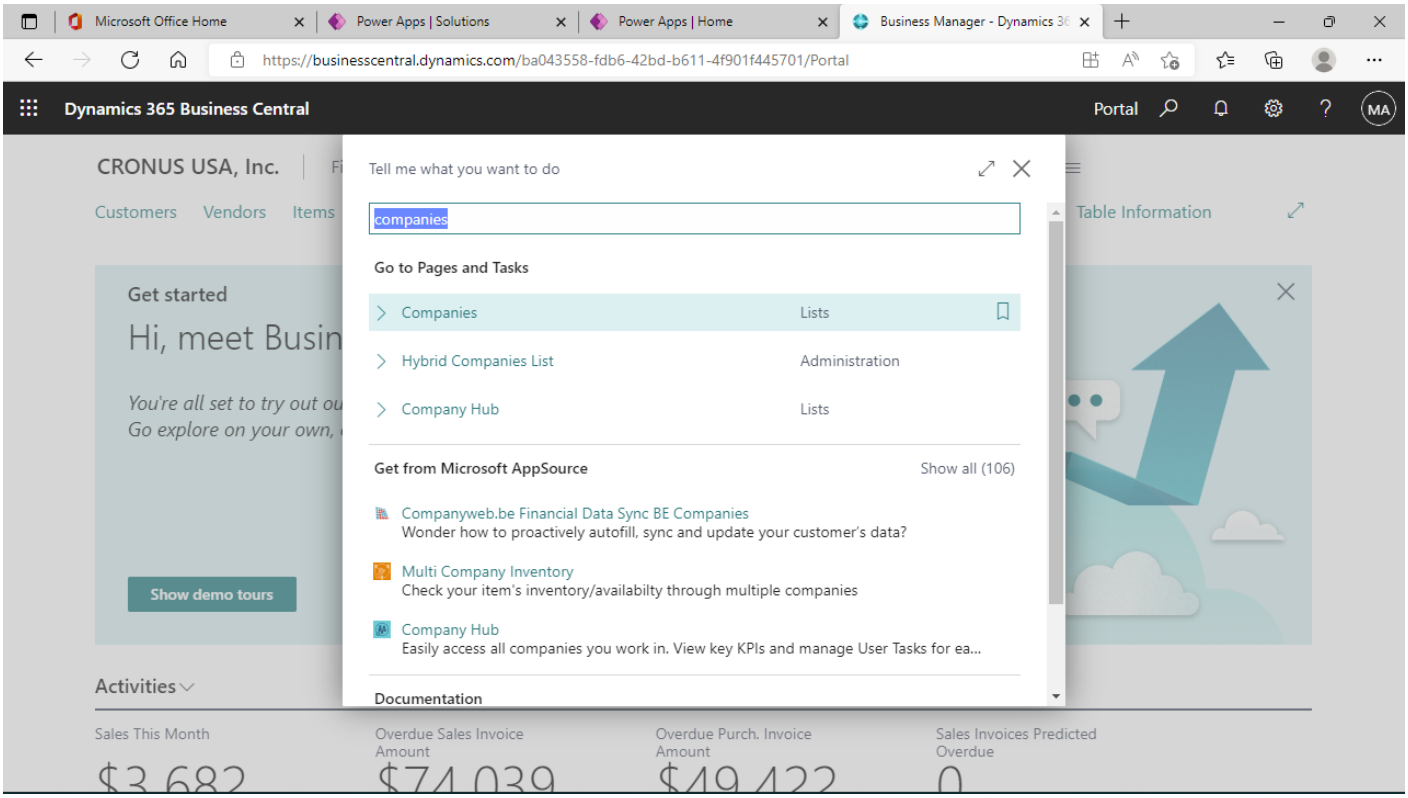


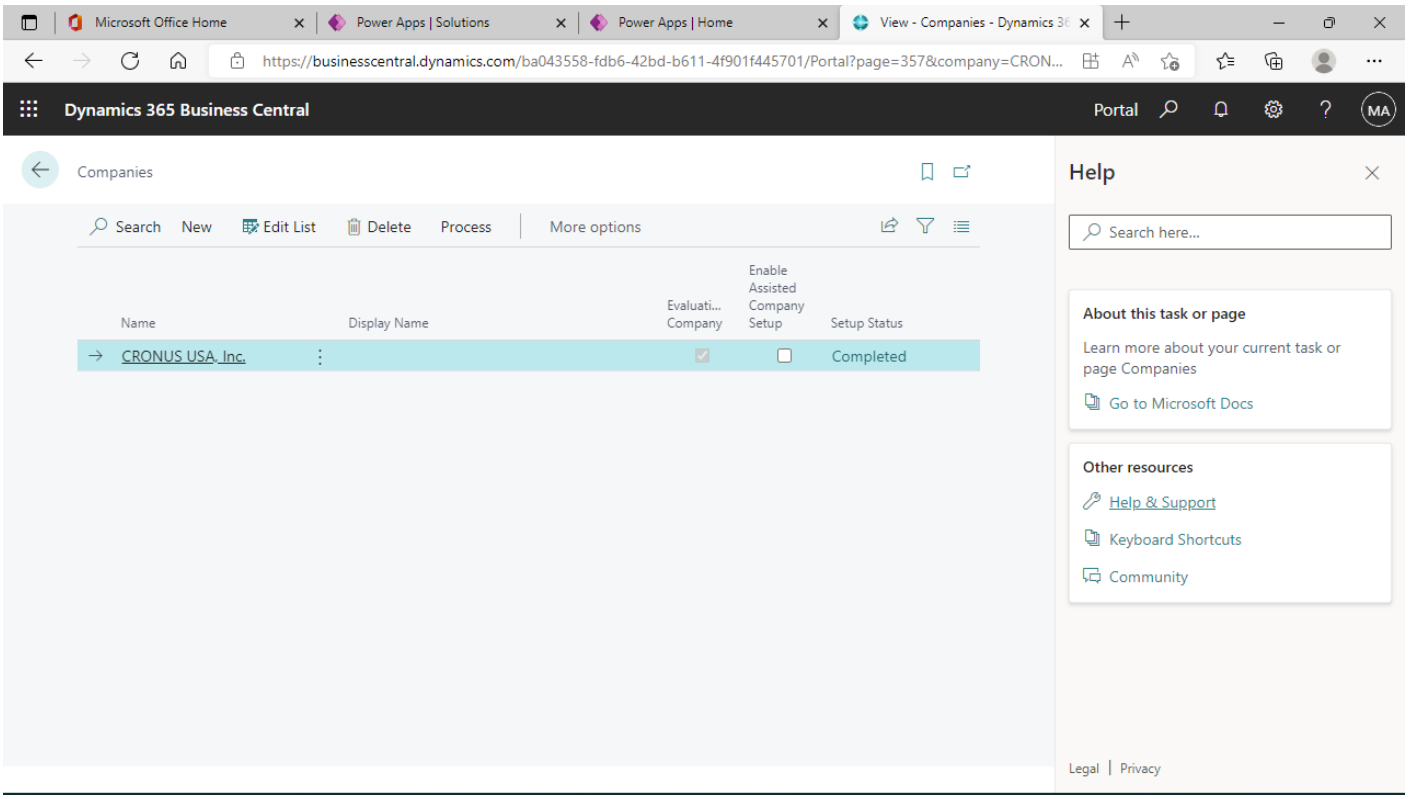
- **BC Environment Name** could be found In **Dynamics 365 Business Central admin center**

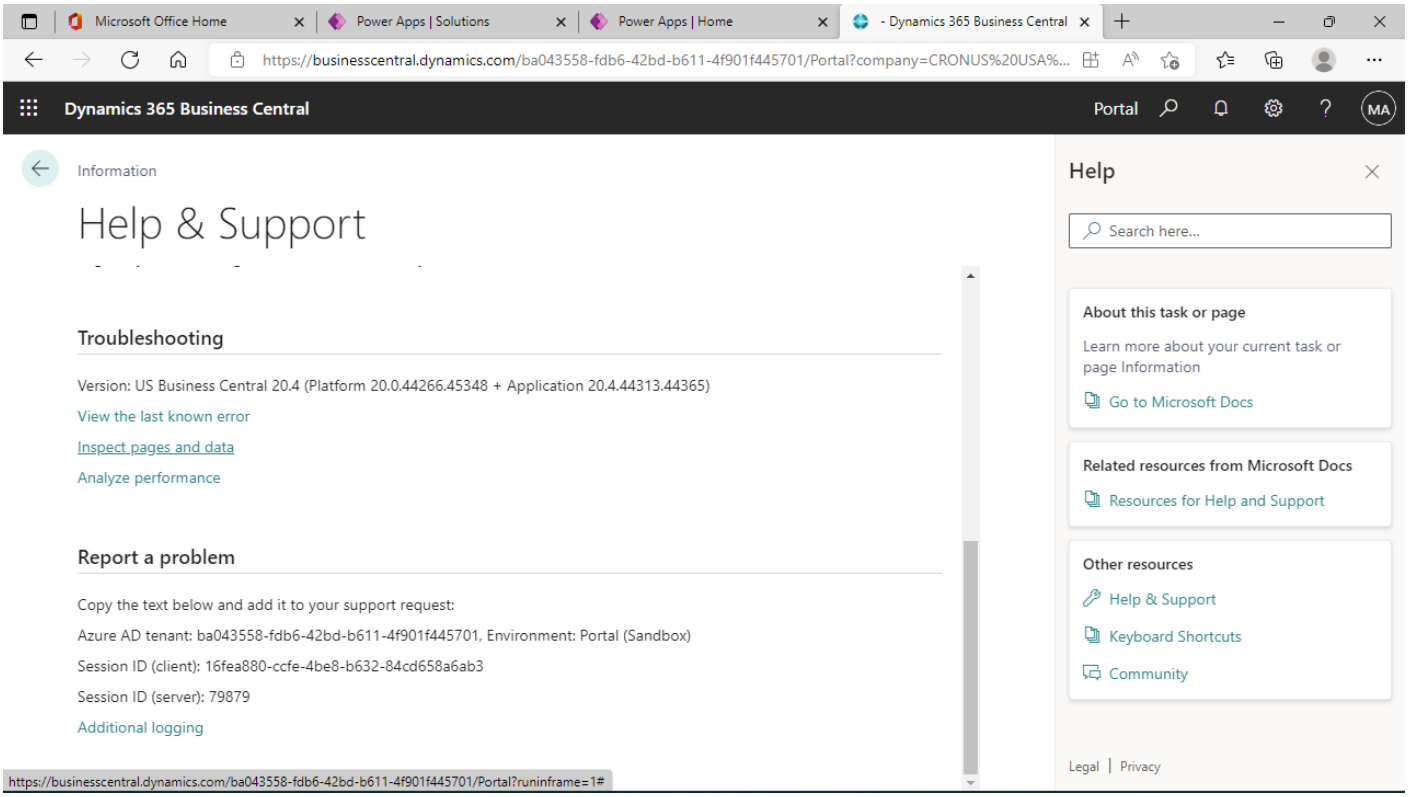




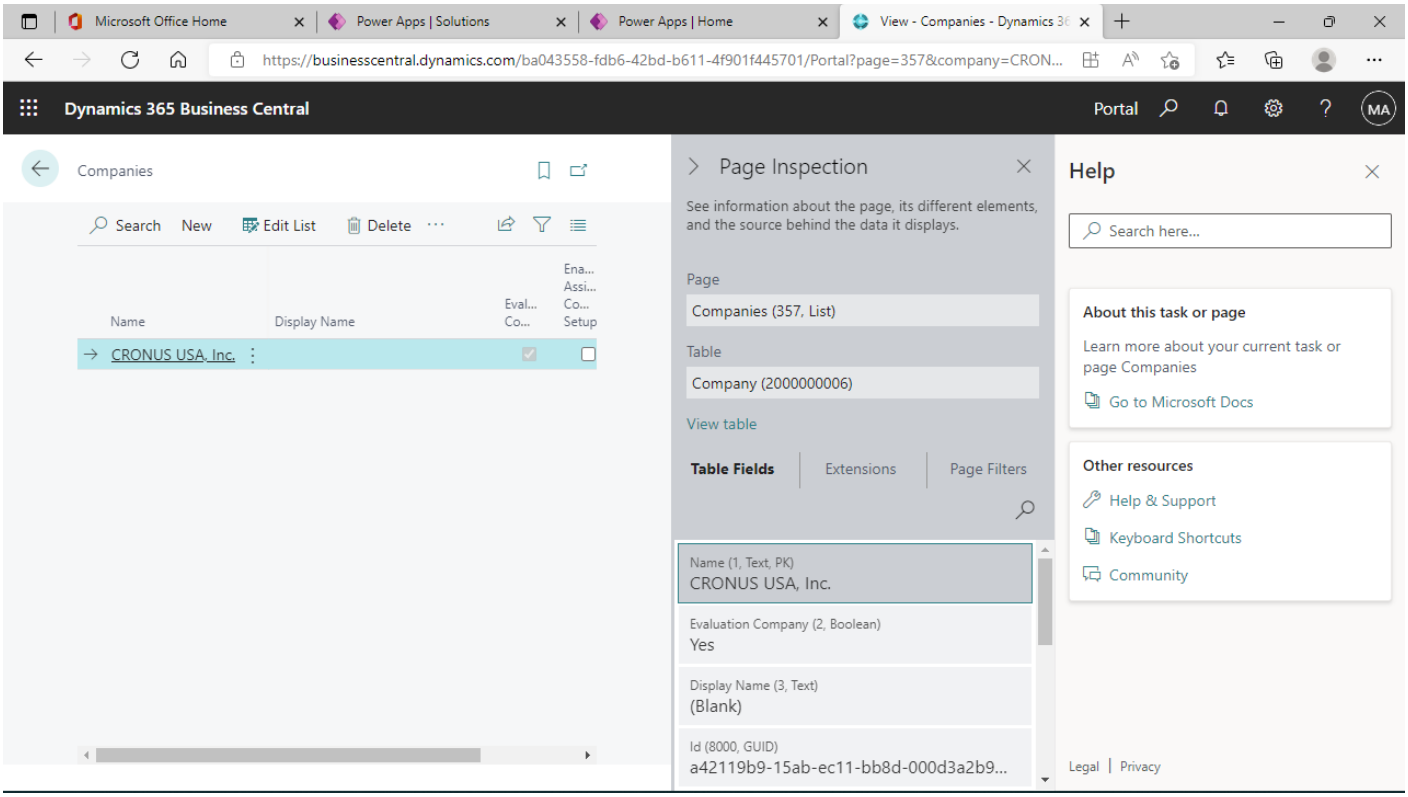
- **BC Company Name and BC Company ID** could be found in **Business Central** by inspecting **Companies** Lists



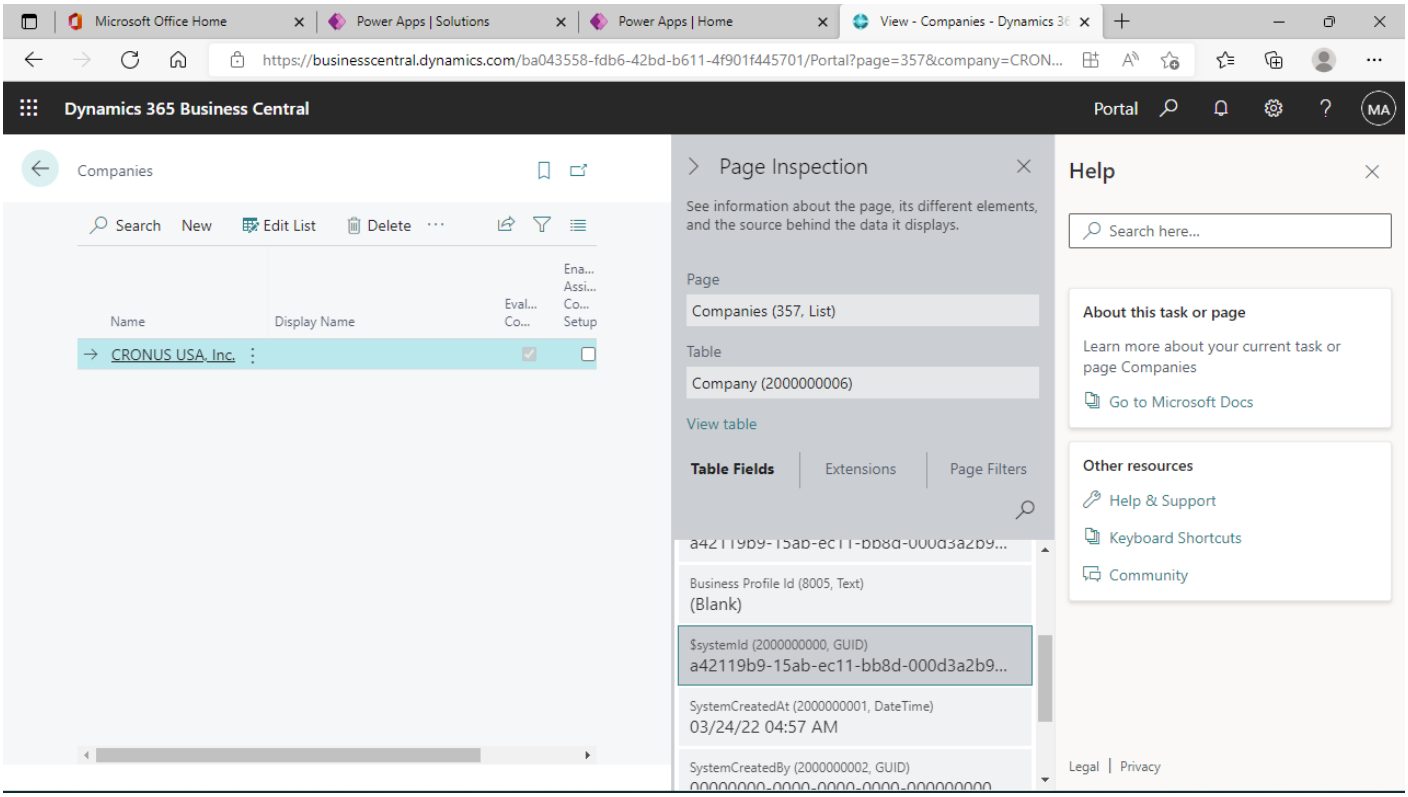




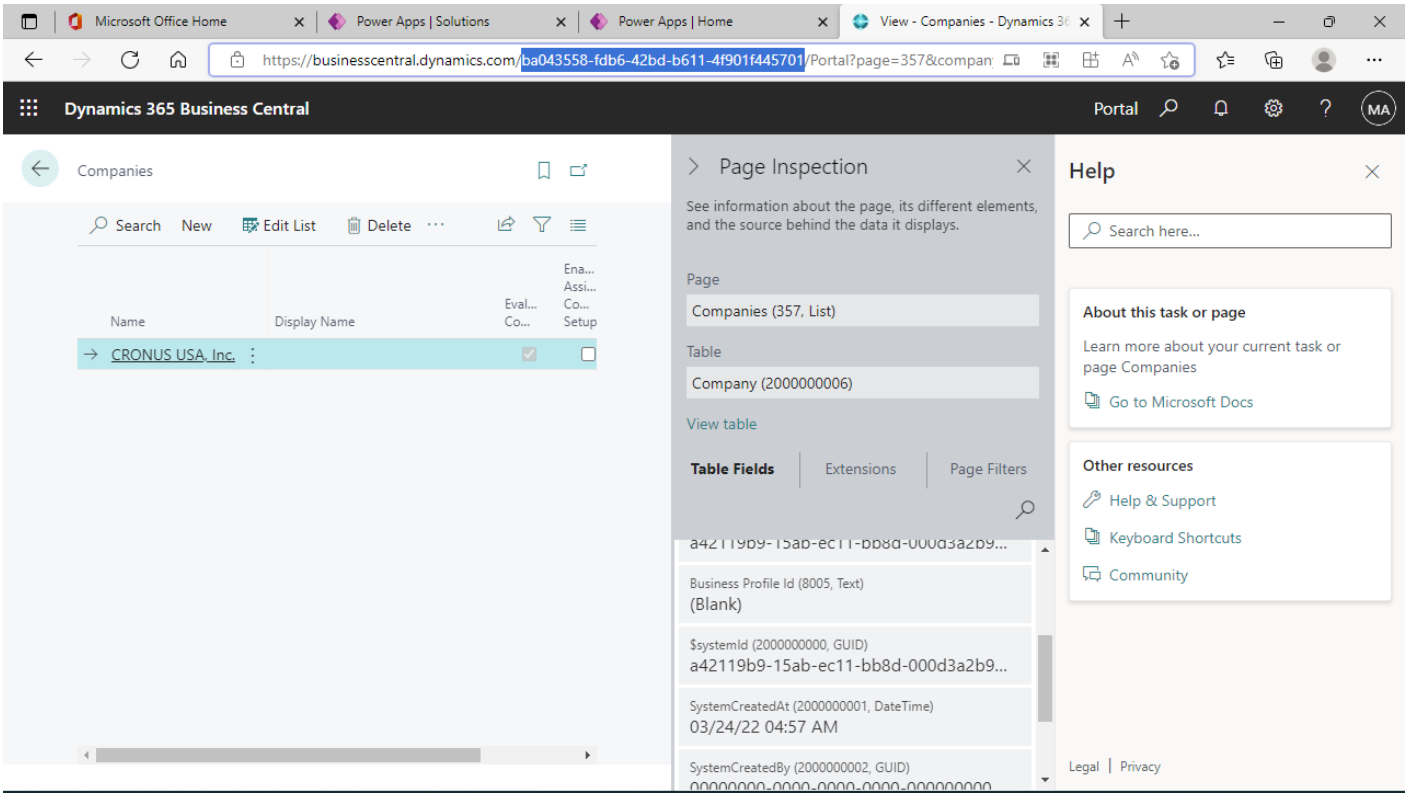
BC Company Name is **Name** parameter



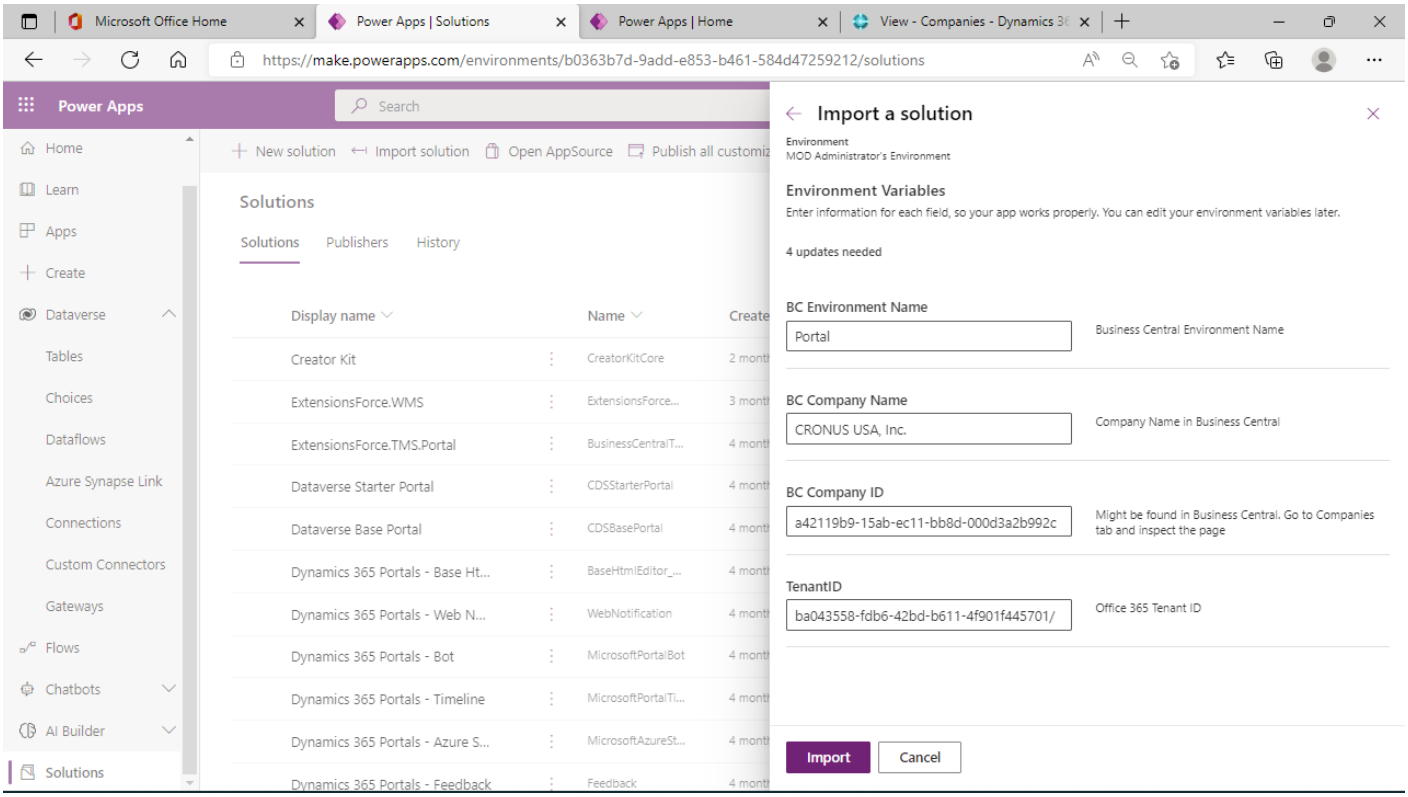
BC Company ID is **$systemId** parameter



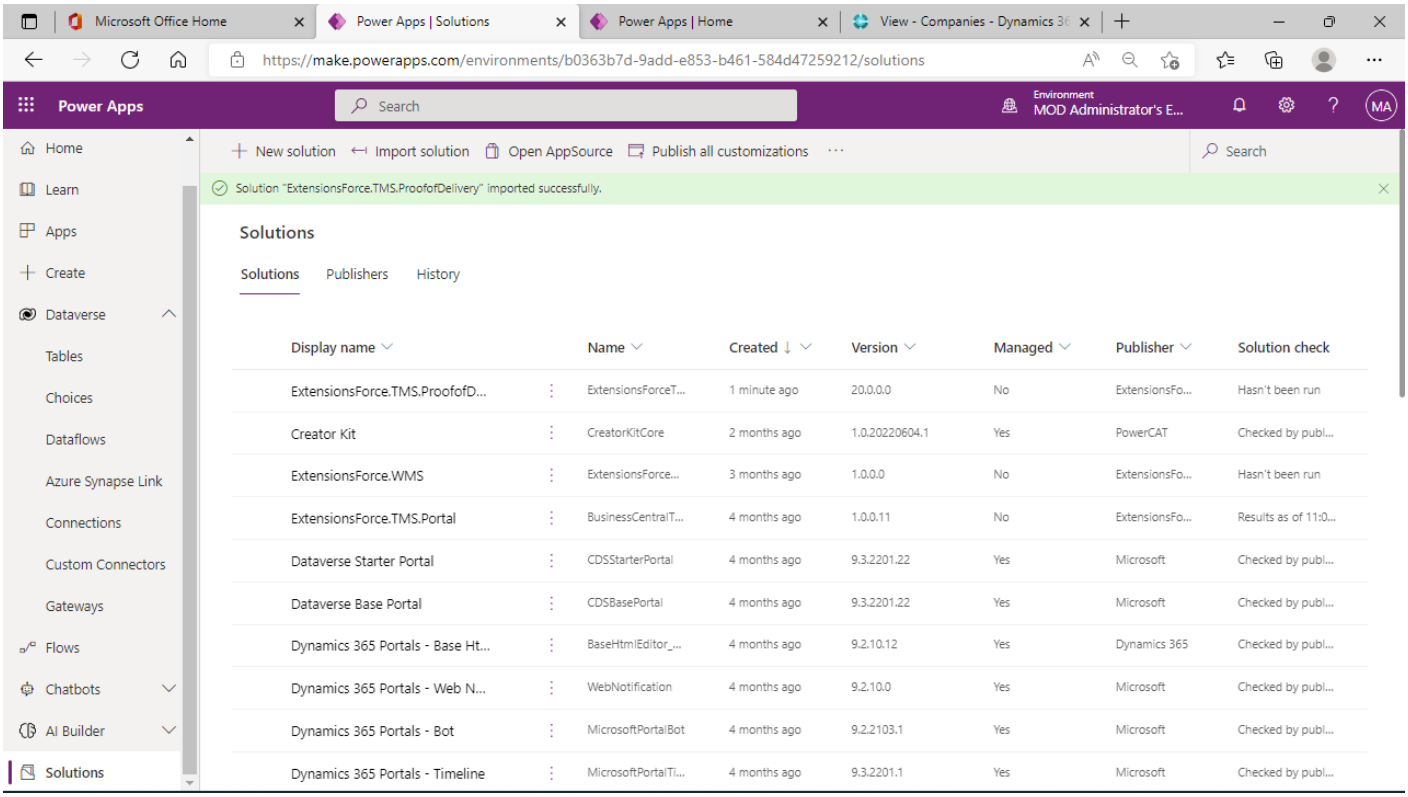
- **Tenant ID** could be found in **Azure Portal** or in the link to **Business Central**



After you enter your **Environment Variables** click **Import**

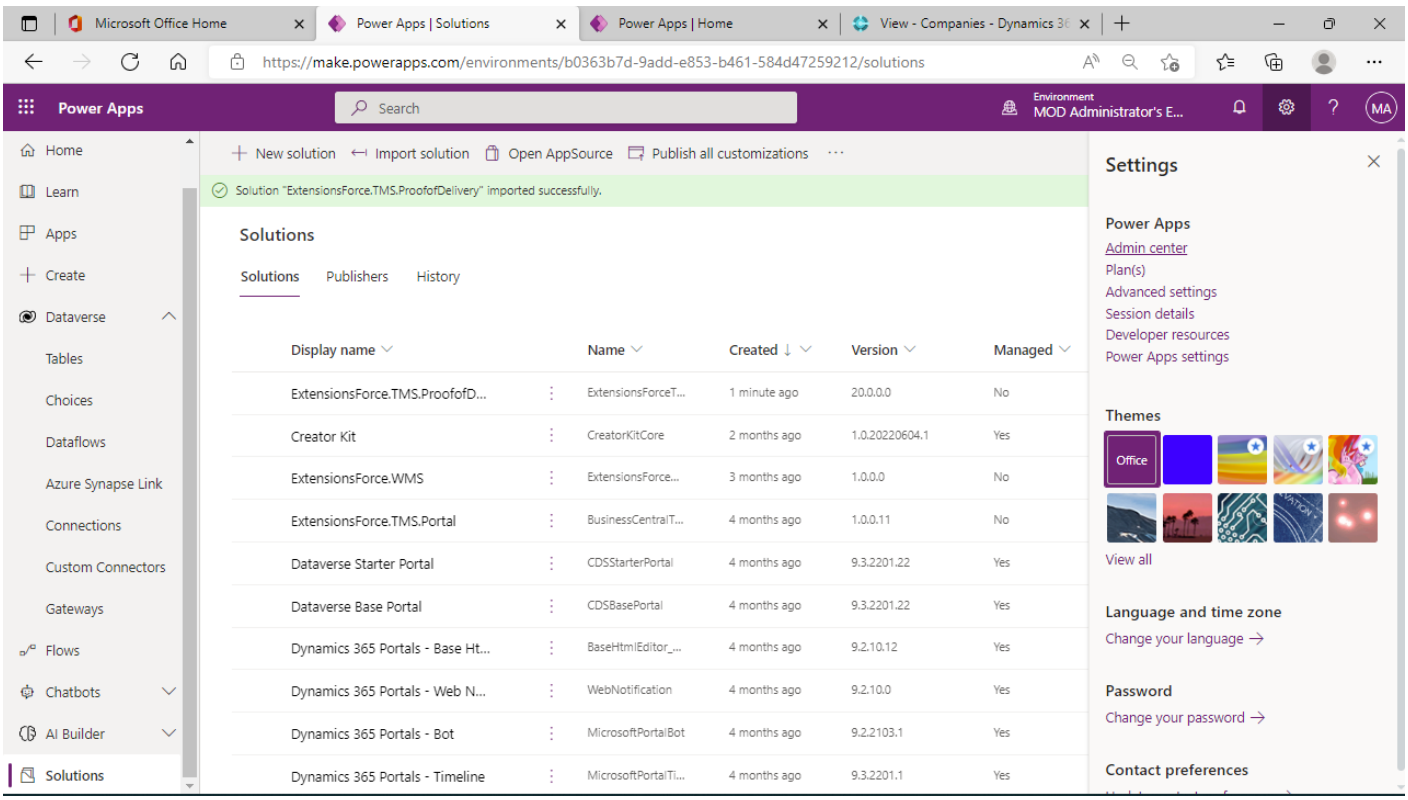


It takes some time to complete importing

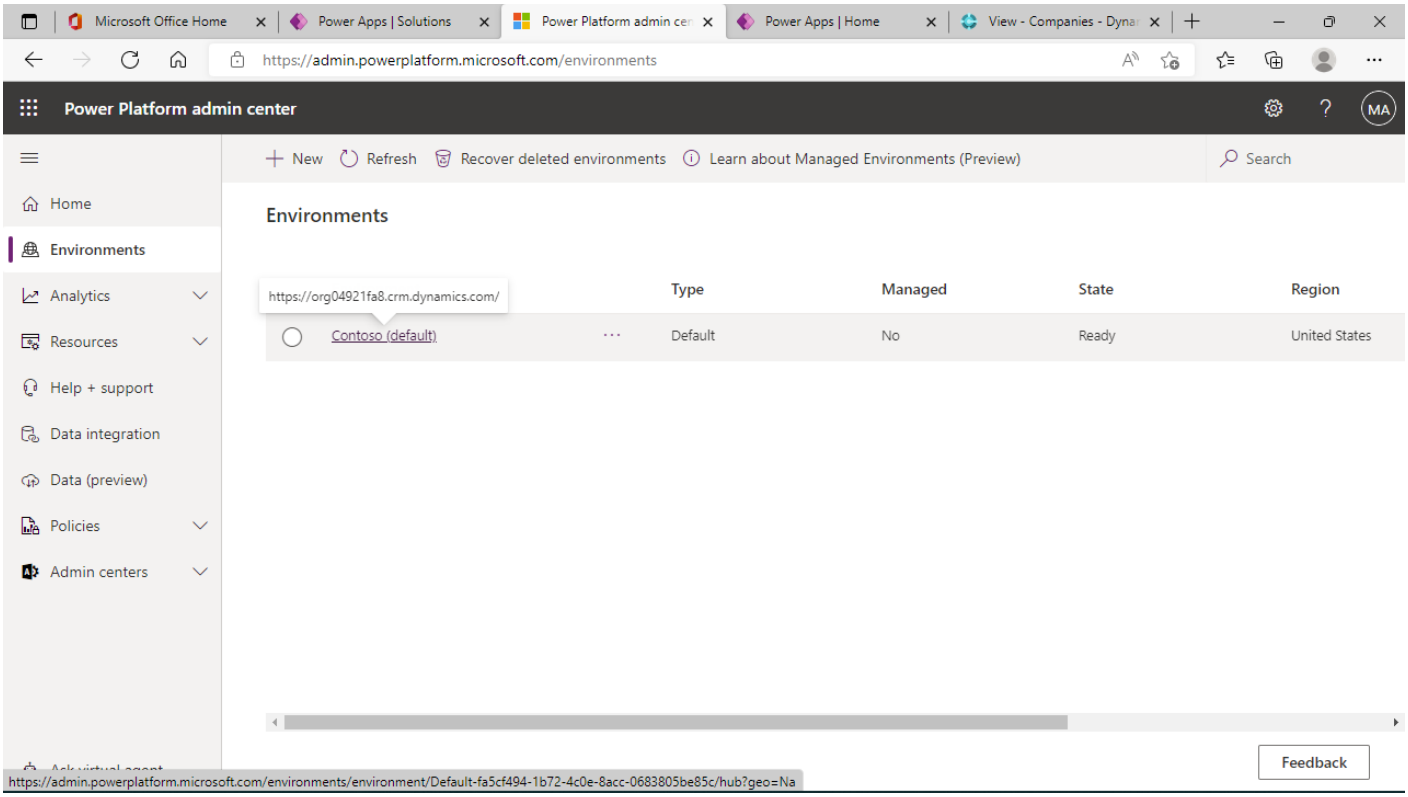


Enable **GeoSpatial** Services

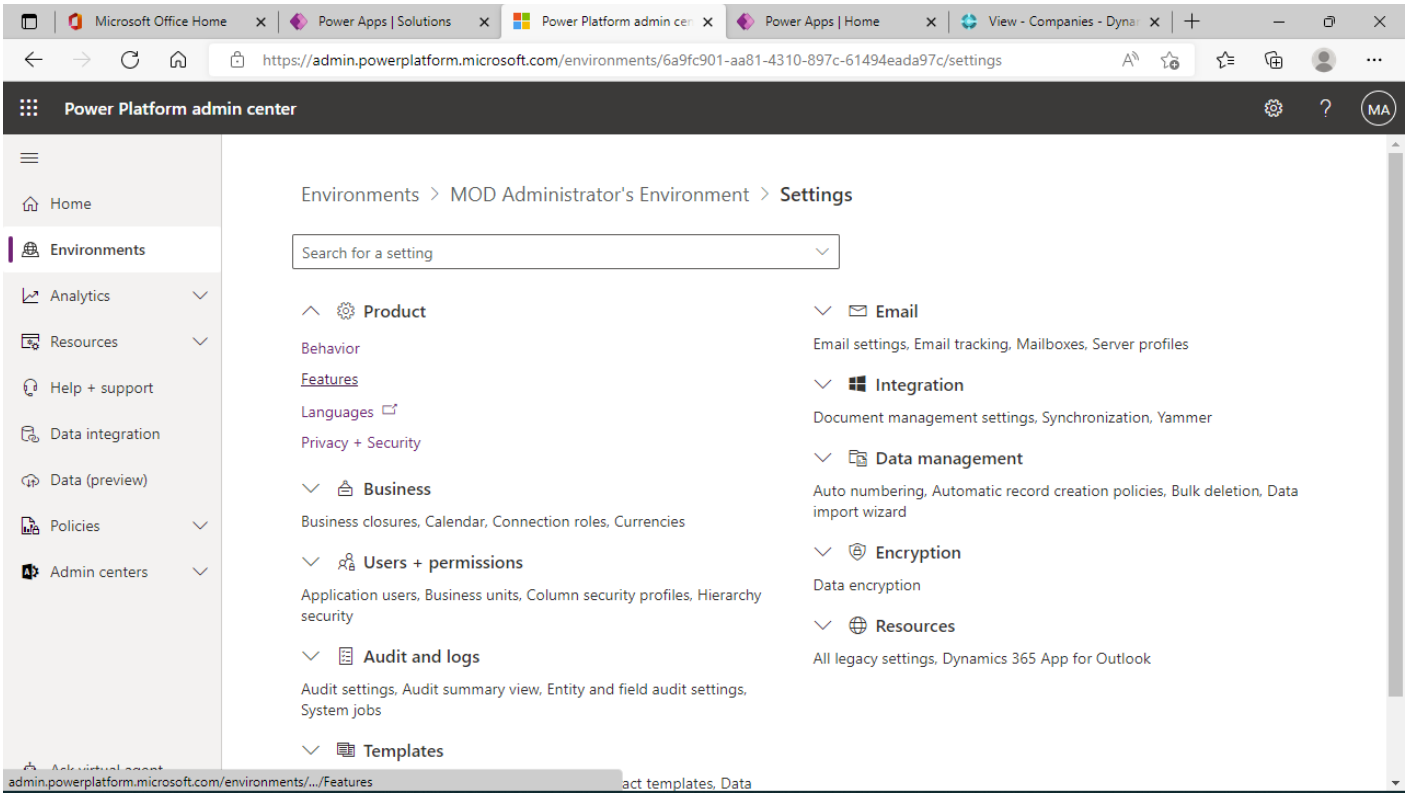
Click **Settings** button in the top-left corner and choose **Admin Center**



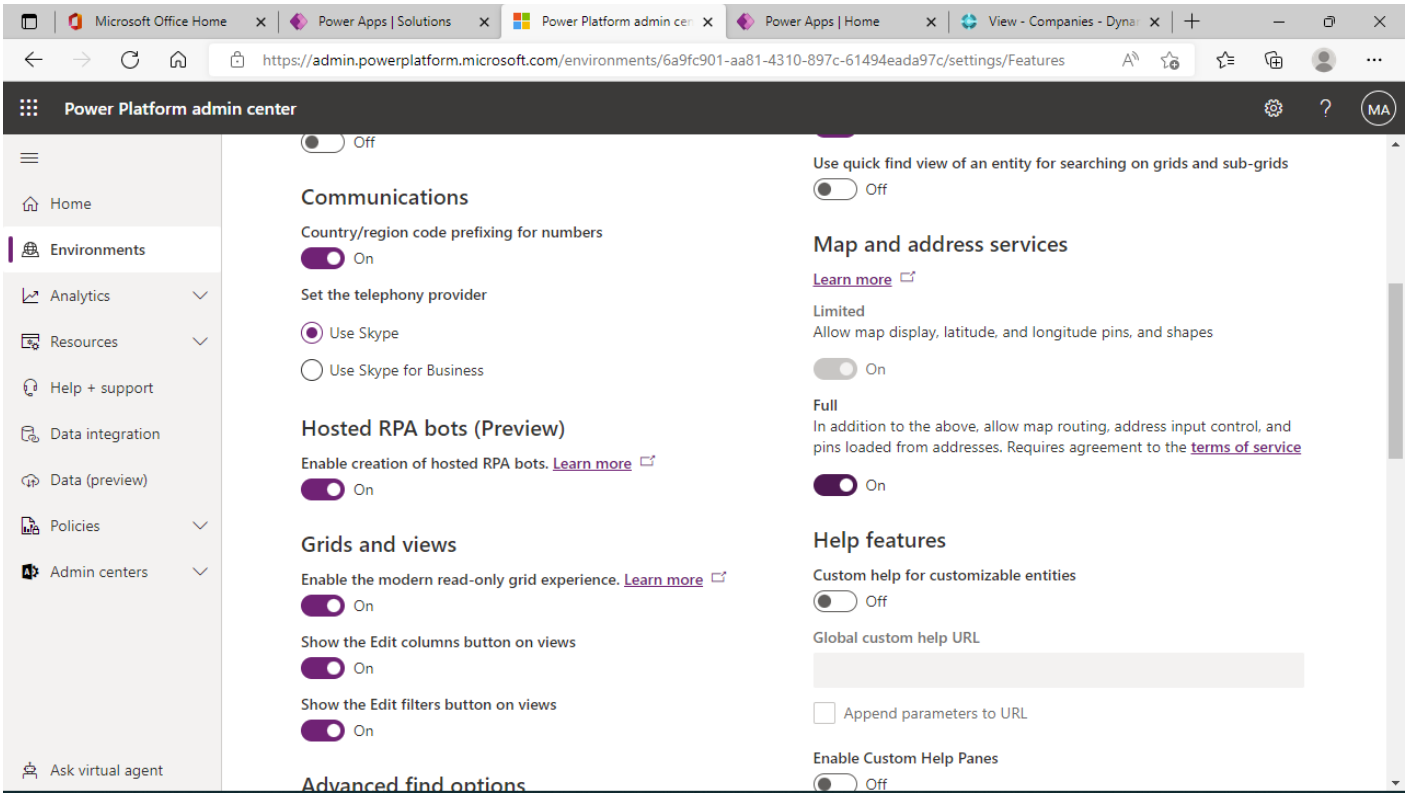
Go to **Environment** tab and click on your **Environment**



In the **Settings** section pop-up **Product** section and choose **Features**

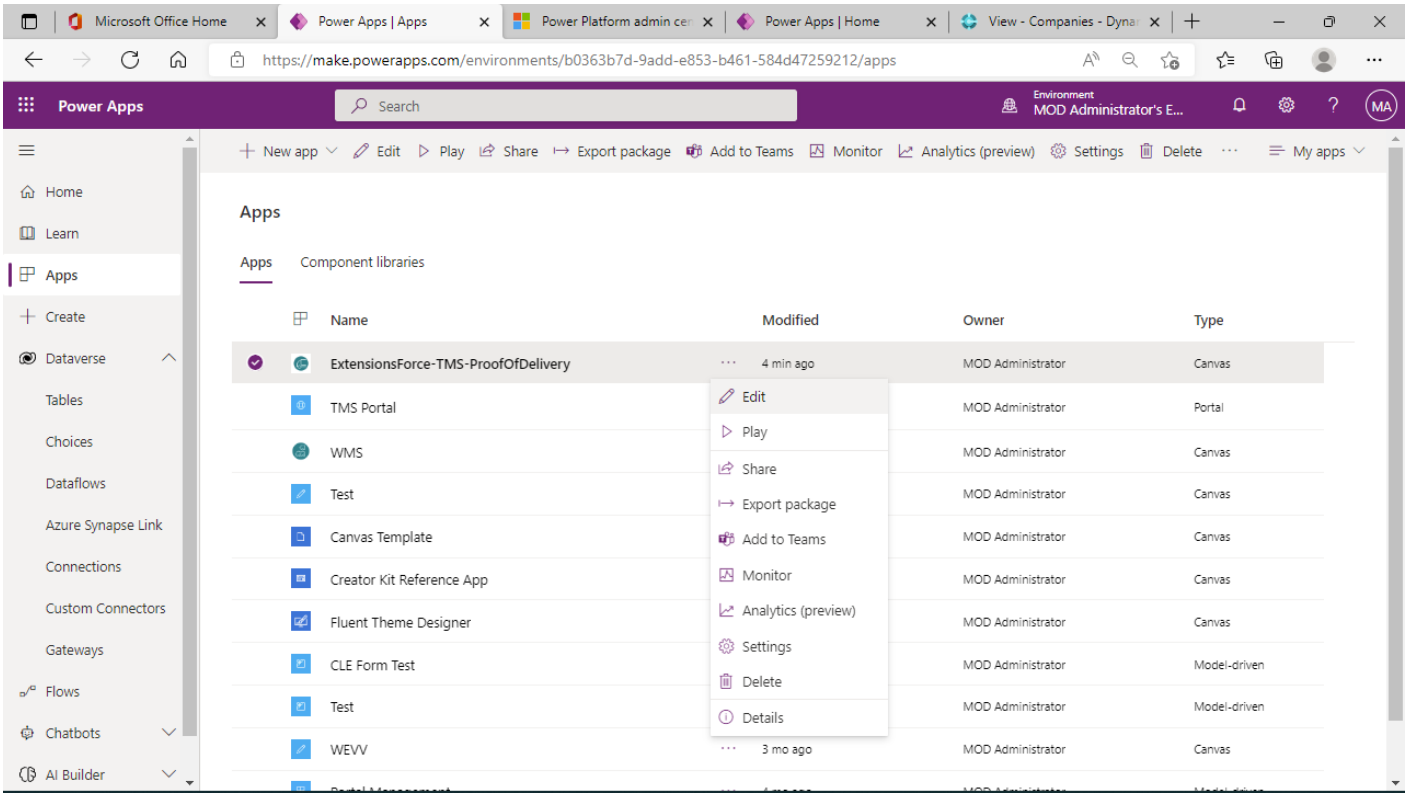


In the **Map and address services** enable **Full** features and click **Save**

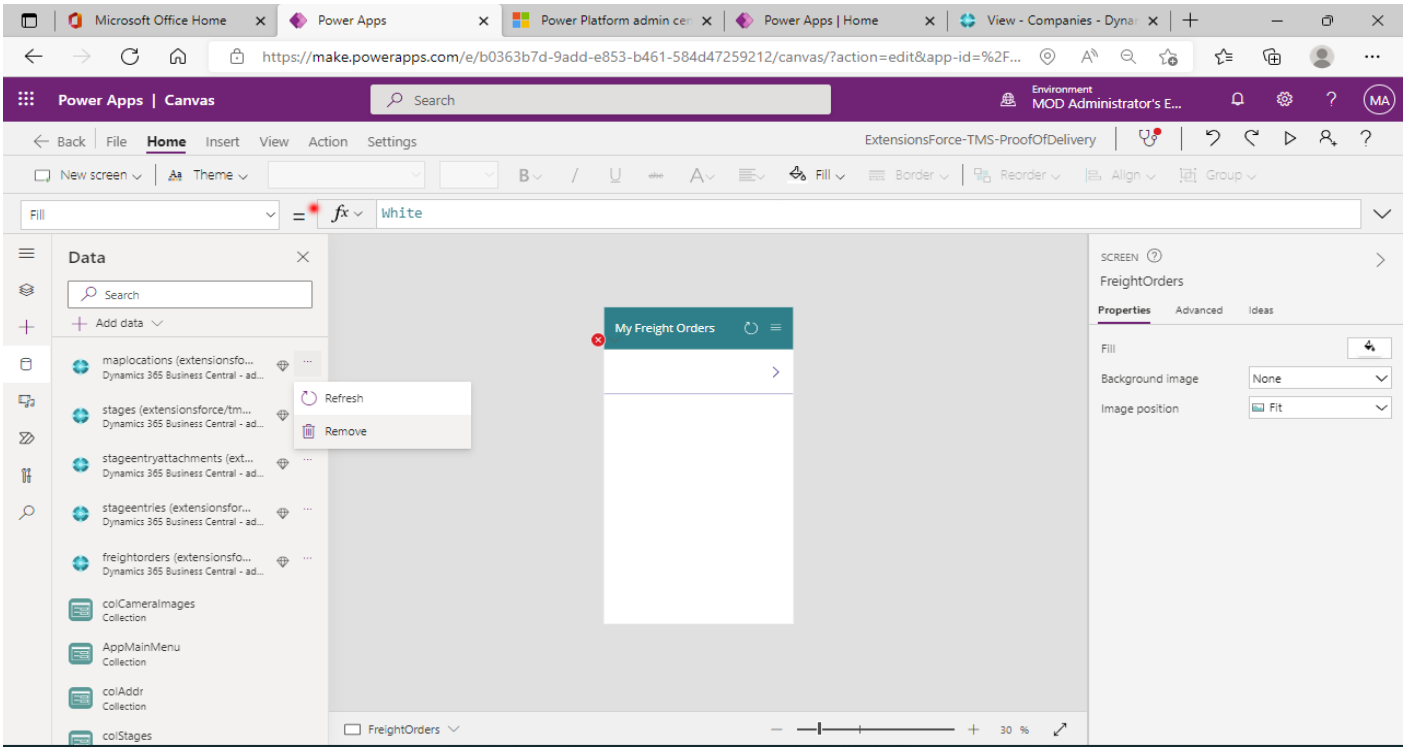


Configuring ExtensionForce-TMS-ProofofDelivery application

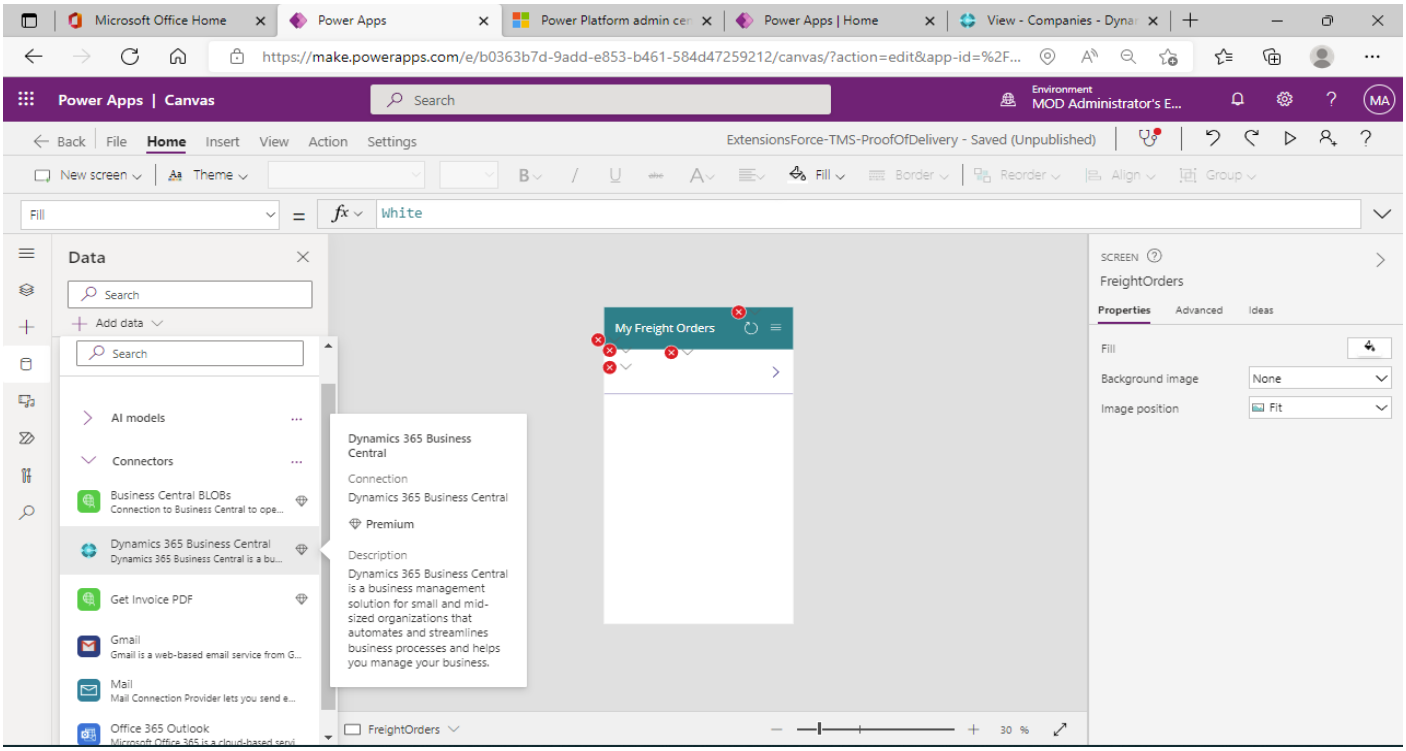
Return to **PowerApps**, choose **Apps** section, click on *** in front of **ExtensionForce-TMS-ProofofDelivery** application then click **Edit. Allow** all prompts you asked

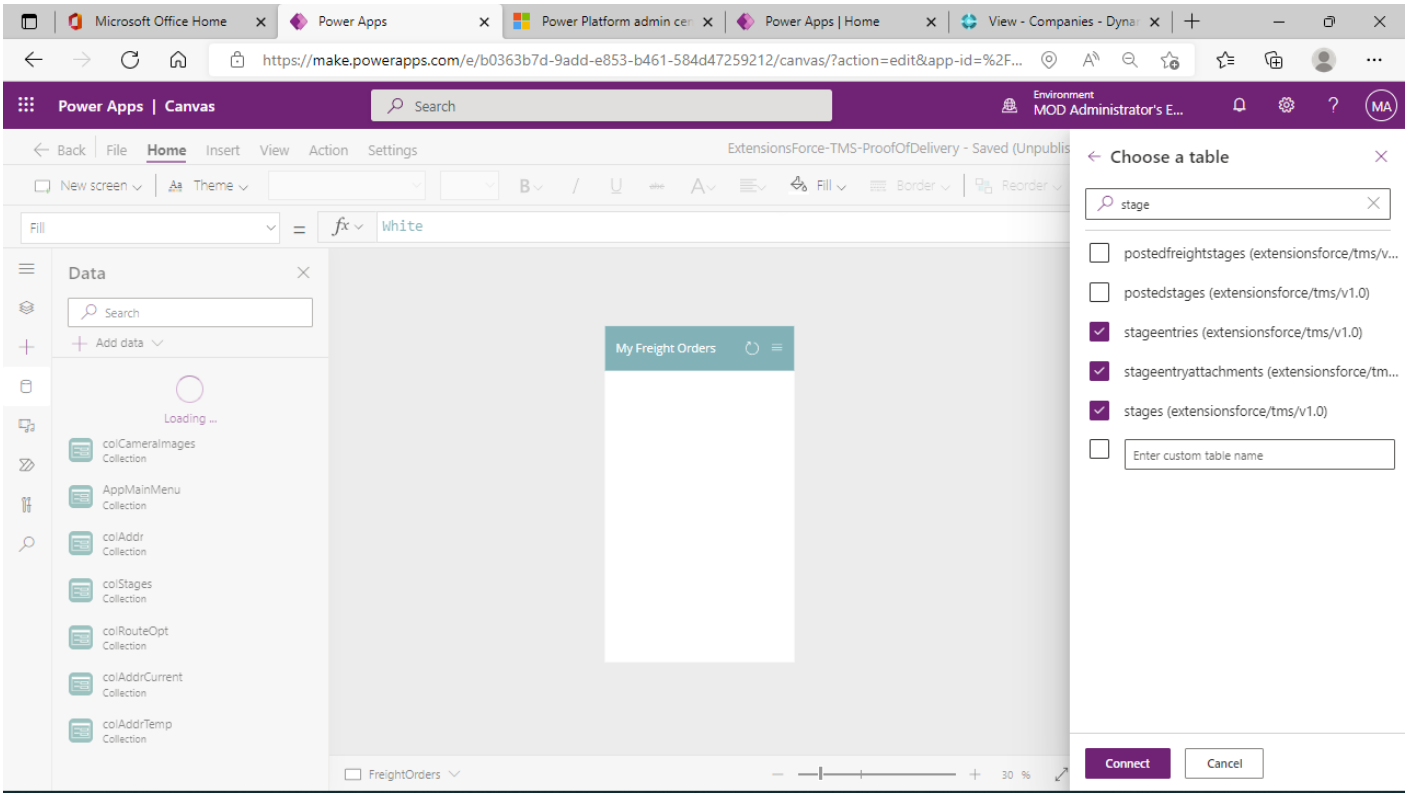


Go to **Data** tab and **Remove** 5 Business Central's connections (**freightorders**..., **stages**..., **maplocations**..., **stageentries**..., **stageentryattachments**...)

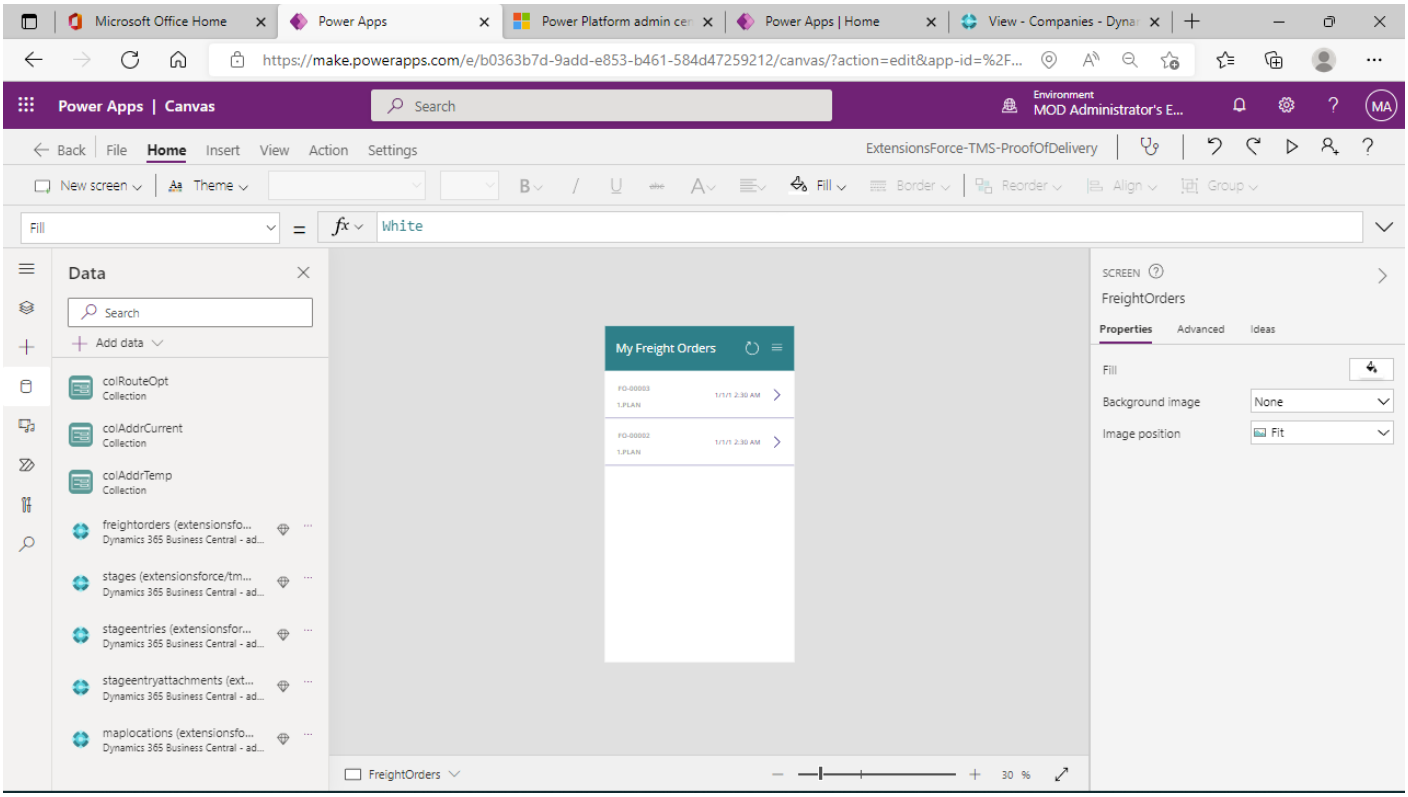


Add yours **Business Central connections** instead of removed (**freightorders**, **stages**, **maplocations**, **stageentries**, **stageentryattachments**)





You should get



Go to **File** menu then **Save** and **Publish** the Application
